# mother's day

The father of the bride must do the all-important walk down the aisle but it's the mums who seem to attract most attention on the day. She has licence to go to town with accessories and a duty to create a look setting her apart from the other guests on the day.

Stereotypically the mother of the bride outfit was the one in the loudest colour and accompanied by the largest hat, but these days anything goes. And while there will always be a place for mums who want to make a statement, the fashion focus of late has been on sophisticated neutral colours, with fascinators becoming a popular alternative to hats.

Be inspired by our selection of glam Real Life mums, and take a look at the latest mother of the bride fashions!
